

Special Issue

Advances in FAIR Geospatial Datasets

Message from the Guest Editors

In today's world, geographical datasets, ranging from latest satellite imagery to scanned gazetteers, are essential for informing us of our complex world, monitoring our environment, establishing policies, and developing new services.

This Special Issue volume focuses on the discoverability, interoperability, and reusability of datasets with a geospatial component on open infrastructures. It welcomes contributions from the domains of open science and FAIR principles, as well as the domain of semantic Web and micro-ontologies adapted to the specific case of geographical datasets. It also welcomes contributions from the domains of spatial data infrastructures, quality documentation platforms, and non-technical aspects linked, for example, to governance that can strongly promote or severely hinder data sharing in a FAIR ecosystem.

Guest Editors

Prof. Dr. Ali Mansourian

Prof. Dr. Joep Crompvoets

Dr. Benedicte Bucher

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Luca Salvati
Department of Economics and Law, University of Macerata, Via
Amaroli 43, I-62100 Macerata, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Geography) / CiteScore - Q2 (Social Sciences (miscellaneous))
