

Special Issue

Mapping of People and Places for Statistics

Message from the Guest Editors

This Special Issue of *Geographies* aims to examine the relationship between geography and statistics in light of the increasing need for up-to-date data with high resolutions in today's world. The ease with which geostatistical data can be produced necessitates a reflection on their reliability, accuracy, and validity. In this context, the added value that geography can provide to both official and non-official statistics through the production of georeferenced data becomes crucial. Statistical data are intimately linked to territorial units, and are referred to as points, lines, polygons, or surfaces. Geographical analyses, based on scale, resolution, and the extent of the areas studied, offer various opportunities for integrating statistical analyses.

About the Journal

Message from the Editor-in-Chief

Geographies is an open access, cross-disciplinary journal that covers the physical features of the earth and its atmosphere, also including the human dimension. The scope of this journal is extremely wide, from the study of the various components that make up our planet, to the tools used to conduct these studies, to the human impacts that affect us all. All of these issues can be addressed at a variety of spatial and temporal scales from global to local and from a single point in time through eons. *Geographies* promotes a quest for knowledge and to finding solutions to many of our most pressing and timely issues to benefit our world.

Editor-in-Chief

Prof. Dr. Luca Salvati

Department of Economics and Law, University of Macerata, Via
Amaroli 43, I-62100 Macerata, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Geography) / CiteScore - Q2 (Social Sciences (miscellaneous))
