About the Journal

Message from the Editor-in-Chief

Geographies is an open access, cross-disciplinary
journal that covers the physical features of the earth and
its atmosphere, also including the human dimension.
The scope of this journal is extremely wide, from the
study of the various components that make up our
planet, to the tools used to conduct these studies, to the
human impacts that affect us all. All of these issues can
be addressed at a variety of spatial and temporal scales
from global to local and from a single point in time
through eons. *Geographies* promotes a quest for
knowledge and to finding solutions to many of our most
pressing and timely issues to benefit our world.
