

Topical Collection

Geohazard Characterization, Modeling, and Risk Assessment

Message from the Collection Editors

This Special Feature Issue calls for papers to deal with mapping, analyzing and modeling natural and human-induced hazards, as well as risk assessment and the reduction of geohazards. We welcome review papers, original research articles and technical notes on mapping, monitoring, modeling, and risk and vulnerability assessment and the reduction of various geohazards. In particular, we solicit each of the Editorial Board Members to contribute a manuscript to this special collection.
