

## Special Issue

# Hydrometeorological Events, Climate Change, and Coastal Risk: Celebrating Women's Contribution to Natural Hazard Research

### Message from the Guest Editor

Hydrometeorological events such as tropical and extratropical cyclones and thunderstorms may cause extreme rainfall, storm surges, and floods that threaten coastal regions across the world. This issue invites studies on extreme weather and climate events and cascading and/or compound hazards as well as studies investigating the coastal impacts resulting from hydroclimate extremes and/or geomorphological changes. We seek to celebrate the achievements of women in science and encourage contributions that showcase women-led research. However, we welcome submissions from all authors, regardless of gender identity. For more information, please view the following link:

## About the Journal

### Message from the Editorial Board

---

#### Editors-in-Chief

Prof. Dr. Zhong Lu

Roy M. Huffington Department of Earth Sciences, Southern Methodist University, Dallas, TX 75275, USA

Prof. Dr. Tiago Miguel Ferreira

Instituto Superior Técnico (IST), University of Lisbon, Av. Rovisco Pais, 1049-001 Lisbon, Portugal

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, GeoRef, and other databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.1 days after submission; acceptance to publication is undertaken in 4 days (median values for papers published in this journal in the second half of 2025).
