

Special Issue

Urban Morphology and Environment Monitoring

Message from the Guest Editors

Unprecedented urban growth is one of the most critical global challenges. Understanding the urban design, urban sprawl, morphological changes and their association with urban climate and environment can provide critical insight into sustainable urban practices. This Special Issue invites manuscripts that present new developments and methodologies, best practices, and applications to address the issues related to urban morphology and environment, such as the United Nations' call for "Sustainable Cities and Communities".
