

Special Issue

Open-Source Geoinformation Software Tools in Environmental Modelling

Message from the Guest Editors

This Special Issue invites contributions focusing on modern open-source software tools developed for displaying, processing, analysing, and validating GIS and EO data with the aim of acquiring more in-depth knowledge of the Earth's natural environment, especially concerning their relationship with data acquisition systems, like handheld, airborne, or spaceborne sensors. We also welcome contributions focusing on modern cloud GIS platforms used for spatial data analysis and cartographic purposes for a wide range of environmental applications. Special interest is allocated to tools that make use of parallel processing on high-performance computers (HPCs) and graphic processing units (GPUs). In addition, scientific contributions focusing on the validation of software tools/methods and the accuracy quantification procedures that are needed to ensure the proper use of the results produced by such software tools are welcomed.

About the Journal

Message from the Editor-in-Chief

Geomatics is an information technology discipline which integrates the tasks of gathering, storing, processing, modeling, analyzing, and delivering spatially referenced or location information.

Geomatics journal offers a new forum to promote multidisciplinary research over broad ranges geomatics innovative research and applications. Original contributions in the form of research papers, communications, letters, short notes, and reviews on all aspects of *Geomatics* are invited.

Editor-in-Chief

Turin, L.go Braccini 2, 10095 Grugliasco, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.1 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2024).
