Deadline for manuscript submissions:  
closed (15 September 2018)

**Message from the Guest Editors**

Dear Colleagues,

The journal Geosciences is accepting papers for a Special Issue related to recent advances in studies of the Moon. Since the Apollo era, sample studies, remote analyses, and dynamical models continue to tease out details related to the Moon’s formation and evolution. Additionally, the international lunar science community is eager to continue its presence on the Moon, as evidenced by recent, upcoming, and future lunar missions. All of these topics are of great interest to the broader geoscience community.

The Special Issue welcomes papers that describe studies related to any of the above topics and will be an outlet for rapid, accessible, and peer-reviewed publications. The editors especially welcome papers from young investigators.

Dr. Nicolle E. B. Zellner  
Dr. Karen Cahill

**Message from the Editor-in-Chief**

Understanding the Earth’s origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive Geosciences to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** Indexed in the Emerging Sources Citation Index (ESCI - Web of Science), Scopus and other databases.

**CiteScore 2018** (Scopus): 1.82, which equals rank 49/182 (Q2) in the category 'General Earth and Planetary Sciences'.
