

Special Issue

Geosciences, Development and Sustainability: Africa and Europe Together

Message from the Guest Editors

With this Special Issue, we intend to assemble a set of scientific works that have evolved from a cooperative relationship between African and European institutions, independent of the origin of the authors. Particular interest will be given to research focused on the Sustainable Development Goals most linked to Earth Sciences. As examples, this Special Issue will welcome manuscripts closely associated with the following themes:

- Assessment of tangible and immaterial geological resources and how they can affect the well-being in different sectors of society.
- Evaluate vulnerabilities to geological processes, taking into consideration natural dynamics and disturbances caused by human action.
- Teaching and disseminating geological knowledge, contributing to the increasing awareness of risks and opportunities, and reducing inequalities.
- Diversity to advance towards an inclusive society in Africa.

We hope you will consider this Special Issue of *Geosciences* an interesting opportunity to publish your research work.

Guest Editors

Dr. Pedro Dinis

Dr. Sónia Victória

Dr. Daud Jamal

Dr. Irene De Felipe

Dr. Giovanna Antonella Dino

Dr. Nelson Rodrigues

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive Geosciences to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. Alberto G. Fairén

1. Centro de Astrobiología, CSIC-INTA, Madrid, Spain
2. Department of Astronomy, Cornell University, Ithaca, NY, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
