

Special Issue

Advancing Earthquake Forecasting: Integrating Physics-Based and Statistical Approaches

Message from the Guest Editors

This Special Issue invites contributions on the latest research in physics-based stochastic modeling of natural and induced earthquakes, supported by multidisciplinary methods. We welcome studies on improving earthquake forecasting through stochastic models, geodesy, paleoseismic records, fluid dynamics, crustal stress analysis, and AI-driven models. Our emphasis is on bridging statistical and physics-based approaches to provide more reliable short- and long-term seismic hazard estimates.

Guest Editors

Dr. Petrillo Giuseppe

Dr. Matteo Taroni

Dr. Ilaria Spassiani

Dr. Simone Barani

Deadline for manuscript submissions

30 September 2026

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. Alberto G. Fairén

1. Centro de Astrobiología, CSIC-INTA, Madrid, Spain
2. Department of Astronomy, Cornell University, Ithaca, NY, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q2 (General Earth and Planetary Sciences)
