

Special Issue

Advanced Numerical Modelling and Analysis in Geotechnical Engineering

Message from the Guest Editors

This Special Issue of Geosciences aims to gather high-quality original research articles, reviews, and technical notes on the use of advanced numerical modelling and analysis in geotechnical engineering.

Today, the upcoming need to construct more sustainable and resilient new geostructures or re-purpose and re-use existing ones creates a more significant challenge for geo-engineers and geoscientists, who are requested to design complex projects while optimising available resources. It is evident that numerical modelling is widely used to design or back-analyse geotechnical structures. However, advances in the speed and memory of computers mean that it is no longer just experts that use them, as increasingly sophisticated tools are being used by more and more engineers and geoscientists to build and run ever more complex models. There is, therefore, a greater need for knowledge sharing and returns of experience and lessons learnt amongst the geoenvironment and geosciences community on this topic.

Guest Editors

Dr. Chrysothemis Paraskevopoulou
School of Earth and Environment, University of Leeds, Leeds LS2 9JT, UK

Dr. Benoit Jones
Inbye Engineering, Coventry CV1 2NP, UK

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
