# **Special Issue**

# Navigating Hydrological Challenges in a Changing Climate: Lessons and Innovations

### Message from the Guest Editors

The global climate is undergoing unprecedented changes, with profound implications for hydrological systems worldwide. As the frequency and intensity of extreme weather events increase, the need for innovative and sustainable water management strategies becomes more critical than ever. This Special Issue invites original research papers that explore the latest advancements in hydrology, water quality, climate change adaptation, and sustainable water management.

### **About the Journal**

### Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherentset of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientificallybased political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

### **Editor-in-Chief**

Prof. Dr. Alberto G. Fairén

- 1. Centro de Astrobiología, CSIC-INTA, Madrid, Spain
- 2. Department of Astronomy, Cornell University, Ithaca, NY, USA

#### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

### Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
