

Special Issue

Advances in Analytical Chemistry for Mineralogical and Environmental Studies

Message from the Guest Editors

Chemical research is crucial in the field of Earth sciences. In mineralogical research, which employs modern instrumental methods, it is possible to determine the physicochemical properties of minerals and rocks; it is therefore possible to study the evolution of not only the studied massifs but also individual minerals, which can store information about the different stages of crystallization in a variable geological environment within their structure. These studies also utilize environmental analyses that aim to determine the degree of environmental pollution and the impact of anthropogenic pressure on ecosystems, with chemical research being the basis of all these tasks. This Special Issue of *Geosciences* therefore welcomes the submission of articles that address the above topics.

Guest Editors

Dr. Miłosz Huber

Institute of Earth and Environmental Sciences, Maria Curie-Skłodowska University, Lublin, Poland

Prof. Dr. Daniel Kamiński

Department of Organic Chemistry And Crystallochemistry, Faculty of Chemistry, Maria Curie-Skłodowska University, Lublin, Poland

Deadline for manuscript submissions

30 November 2025

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
