

Special Issue

Arctic Geoarchaeology and Environmental Archaeology

Message from the Guest Editors

This Special Issue welcomes articles dedicated to the study of interactions between humans and the environment (in circumpolar arctic and subarctic regions) in the context of climate change over time. Of special interest are papers dealing with the resilience (or non-resilience) of humans to environmental changes based on geoarchaeological proxies and/or environmental archaeological proxies at sites located in high latitude regions. Papers focusing on archaeological sites threatened by the effects of climate changes (coastal erosion, permafrost degradation, shrubification, etc.) are also of interest.

Guest Editors

Prof. Dr. Najat Bhiri

Prof. Dr. Émilie Gauthier

Dr. Dominique Todisco

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
