

Special Issue

Research on Quaternary Stratigraphy and Paleogeography

Message from the Guest Editor

Numerous investigations have been conducted to date regarding the climatic and surface alterations that occurred during the Quaternary. Our foundation for understanding the stratigraphy of the past 2.5 million years has been established through findings on the local, regional, and global scales, at various sites. This Special Issue will expand on this knowledge base by incorporating innovative approaches that will complement existing data and enhance our comprehension of Quaternary stratigraphy and landscape evolution.

Guest Editor

Dr. Dávid Molnár

Department of Geology and Palaeontology, University of Szeged,
Dugonics tér 13, 6720 Szeged, Hungary

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. Alberto G. Fairén

1. Centro de Astrobiología, CSIC-INTA, Madrid, Spain
2. Department of Astronomy, Cornell University, Ithaca, NY, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
