

Special Issue

Applications of EM Methods for Subsurface Exploration

Message from the Guest Editors

We would like to draw your attention to this Special Issue of *Geosciences* aiming to gather high-quality original research articles, reviews and technical notes on the use of Electromagnetic (EM) methods for shallow subsurface exploration research and applications. There is no doubt about the value of EM for terrestrial, marine, or airborne-borne acquisition to: delineate mineral prospects; assess and monitor environmental influences such as saltwater intrusion; discover new archaeological sites; detect unexploded ordnance; monitoring waste sites; detect cavities and others. The special issue focuses on the application and interpretation of electromagnetic methods for shallow to intermediate subsurface exploration. The call addresses the full spectrum of inductive EM methods in time and frequency domain using active and non-active source fields. The call includes ground-based, airborne, semi-airborne, and marine EM exploration techniques for a wide range of targets ranging from environmental and groundwater problems, archaeological prospection, mineral, geothermal, and hydrocarbon exploration, and other geoscientific studies.

Guest Editors

Prof. Dr. Bülent Tezkan

Dr. Pritam Yogeshwar

Dr. Amir Haroon

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
