

# Special Issue

## Educating for Geoscience

### Message from the Guest Editor

Geoscience education is a key factor in the academic, scientific, and professional progress of any modern society. The IUGS Commission on Geoscience Education, Training and Technology Transfer (IUGS-COGE) was established in 2004 to examine and develop programs to assist developed and developing countries to maintain, expand, or introduce better earth science education, outreach, and technology transfer within their own countries. Geoscience education is essential as it provides opportunities for social/cultural, academic, scientific, and professional growth and development. As David Thompson of Keele University and a founder of the International Geoscience Education Organisation (IGEO) once said, one has to educate the politicians first about the vitality of teaching and learning the earth sciences. We sincerely hope that this Special Issue will inform, inspire, and educate our readers about the importance of the geosciences for the health and well-being of all people and other living things on this finite planet.

## About the Journal

### Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
