Special Issue

Forensic Geoscience

Message from the Guest Editors

This Special Issue of Geosciences aims to gather highquality original research articles, reviews and technical notes on the use of geosciences for forensic investigations. Forensic Geoscience may be defined as a subdiscipline of geoscience that is concerned with the application of Earth Sciences information and methods to investigations, which may come before a court of law.

I would like to invite you to submit articles about your recent work, experimental research or case studies, with respect to the above and/or the following topics:

- · Forensic Geoscience
- Forensic Geology
- Forensic Geophysics
- Forensic Archaeology
- · Remote Sensing and GIS in Forensics
- Environmental Forensics
- Ethics and Best Practices in Forensic Geoscience

Guest Editors

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherentset of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientificallybased political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief
