

Special Issue

Challenges and Research Trends of Geoheritage and Geoconservation

Message from the Guest Editors

In recent years, a significant acceleration in the use of advanced technologies across various fields has been witnessed. These modern tools allow us to develop and test new methods for managing different aspects of our personal and professional lives, as well as allowing for the exploration of new research opportunities. In the fields of geoheritage and geoconservation, these technologies support a wide range of theoretical and practical studies related to definition, management, protection, and dissemination. This Special Issue aims to collect papers covering a broad range of theoretical and practical topics related to the sustainable management of geoheritage and geoconservation. We welcome contributions that focus on leveraging advanced technologies and techniques for data analysis. We also emphasize the importance of protecting, conserving, enhancing, and promoting the educational and touristic enjoyment of geoheritage in its broadest sense. We sincerely invite you to join us in this sharing of ideas and experiences.

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
