

## Special Issue

# Geochemistry and Geochronology of Mineral Deposits

### Message from the Guest Editor

Geochemistry and geochronology are powerful yet elegant techniques helping us to decipher the formation processes and conditions of a variety of mineral deposits. This Special Issue of *Geosciences* invites submissions that apply geochemistry (major and trace elements, stable and radiogenic isotopes, both on whole rock and on minerals) and geochronology ( $^{40}\text{Ar}/^{39}\text{Ar}$ , U/Pb, Rb/Sr) on a wide variety of mineral deposits and in a novel and original way. Submissions on novel developments, techniques and applications, review and critique papers, and papers documenting examples of successful applications are all welcome.

### Guest Editor

Dr. Paul Alexandre

Department of Geology, Brandon University, 270 – 18th Street, Brandon, MB R7A 6A9, Canada

### Deadline for manuscript submissions

closed (25 January 2023)

## About the Journal

### Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

#### Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
