Editorial Board Members' Collection Series: Natural Hazards

Message from the Guest Editors

Natural hazards such as earthquakes, landslides, volcanic eruptions, floods, droughts, and storms continue to pose significant challenges to both human societies and natural ecosystems. These hazards, whether abrupt or evolving over time, present complex challenges that require interdisciplinary approaches to understand, predict, and manage their impacts. This collection aims to gather a diverse range of studies related to geological, environmental, hydro-meteorological, oceanographic, climatological, and biological hazards, as well as those that develop gradually or emerge suddenly. Research that focuses on modeling and forecasting natural hazards, as well as cross-disciplinary approaches addressing hazard assessment, mitigation strategies, emergency response, and post-disaster recovery, are particularly welcome. We welcome contributions from researchers worldwide, with a focus on ground-based investigations, in situ instrumentation, remote sensing techniques, and innovative methodologies. We look forward to receiving high-quality submissions and engaging with research that makes a real impact.

Guest Editors

Prof. Dr. Dimitrios Nikolopoulos

Dr. Samuele Segoni

Dr. Xingsen Guo

Dr. Danilo Godone

Dr. Giovanna Vessia

Dr. Leonhard Blesius

Deadline for manuscript submissions

30 September 2025

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
