

## Special Issue

# Geodesy and Geomatics Engineering

### Message from the Guest Editor

I am pleased to invite you to publish your research in this Special Issue of *Geosciences* entitled “Geodesy and Geomatics Engineering”. The scope of this issue includes topics related to geodesy—from measurements of the Earth as a planet to detailed applications in surveying. Articles describing case studies in the aforementioned subjects may be admitted for publication (research using innovative measurement technologies is particularly desirable). Articles may include, but are not limited to, the following topics:

- Terrestrial and mobile laser scanning, including maritime laser scanning
- coastal and offshore geoengineering
- engineering surveying and monitoring
- engineering photogrammetry
- natural resource monitoring and development
- GIS applications
- geoinformatics

## About the Journal

### Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.
