

Special Issue

Impacts of Compound Hydrological Hazards or Extremes

Message from the Guest Editors

Hydro-hazards have devastating social, environmental and economic impacts, with vulnerable members of society often disproportionately affected. The impacts cross many different sectors and communities, including infrastructure, built and natural environments, the elderly or young, human health, economic activity, and cultural heritage. This Special Issue focusses on research into the impacts of hydro-hazards. Specifically, papers are invited investigating the impacts of compound hydro-hazards, such as:

- extreme precipitation, river discharge or storm surge interactions leading to floods;
- the clustering of spatially- and/or temporally-dependent storms leading to flooding;
- uncertainty estimation of hydro-hazard risks under climate change ;
- compound hydro-hazard management case studies or champion projects;
- multi-hazard assessment, response, recovery and planning tools for decision support;
- resilience assessment and modelling for multi-hydro-hazard resilient environments.

Guest Editors

Prof. Dr. Lindsay Beever

Dr. Christopher White

Dr. Maria Pregolato

About the Journal

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.

Editor-in-Chief

Prof. Dr. John C. Eichelberger

Alaska Center for Energy and Power, University of Alaska Fairbanks,
Fairbanks, AK, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, Astrophysics Data System, and other databases.

Journal Rank:

CiteScore - Q1 (General Earth and Planetary Sciences)
