Message from the Guest Editor

Dear Colleagues,

Bone health and falls are important issues for older adults. Despite years of research, large scale studies, and many therapeutic options, there are many grey areas that remain regarding the care of older adults with osteoporosis and falls.

The therapeutics of osteoporosis and osteopenia, including the duration and safety of the medications, and interventions for prevention, are controversial. Falls are a challenging geriatric syndrome, and represent the most common form of accident in older adults.

This Special Issue will include a range of articles regarding bone disease and falls, including, epidemiology, basic science, and clinical studies that focus on assessment, management, or prevention.

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: CiteScore - Q2 (*Health (social science)*)
