Geriatric Assessment—broadly defined—is the foundation of care for frail elderly people at risk for functional decline, death, and long-term institutionalization. Its key feature is ascertainment of multiple dimensions of health and health risks—not only medical, but functional, cognitive, psychological, and socioeconomic status. This multidimensionality is key to systematic screening and targeting to uncover frail, at-risk elderly people in their neighborhoods, homes, and at various other service contact points, for more intensive evaluation, i.e., “comprehensive geriatric assessment” (CGA)—a multidisciplinary diagnostic and treatment process that identifies medical, psychosocial, and functional limitations of a frail older person to develop a coordinated plan to maximize overall health with aging.

We invite international submissions describing new or established CGA-oriented or based processes, technologies and models of care, particularly welcoming evaluations, quasi-experiments, and randomized trials aimed at establishing their outcomes, costs, and value.

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in Geriatrics. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to Geriatrics soon to publish innovative, relevant, thought provoking ideas.

Author Benefits

Open Access: - free for readers, with article processing charges (APC) paid by authors or their institutions.
High visibility: Covered by the Emerging Sources Citation Index (ESCI - Web of Science). Citations available in PubMed, full-text archived in PubMed Central.
Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2018).
