Message from the Guest Editors

Dear Colleagues,

During the second part of Twentieth Century, worldwide, there has been an important process of conceptualization on active ageing and healthy ageing, related to the progressive ageing of populations in most countries. The conceptualization of ageing is strictly related to the anthropological framework at the bottom of it and to the interest to all the phases of the life, but it is also strictly related to semantical choices. In the semantic of ageing we found different words, like active ageing, healthy ageing, successful ageing etc. There are different variables that make the difference: A focus on subject and subjectivity, the focus on well-being and quality of life as central outcomes, and the sociocultural influences that make some variables more important than others and define the role of the oldest people in society. The aim of the Special Issue is to discuss different variables related to different semantical choices and to propose some critical hints in analysis in this field.

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: CiteScore - Q2 (*Health (social science)*)
