

Special Issue

The Rehabilitation and Management of Dysphagia

Message from the Guest Editor

I am acting as the for a Special Issue of the journal *Geriatrics* on the subject of **"The Rehabilitation and Management of Dysphagia"**. It is my pleasure to invite you to submit an article on this topic. Dysphagia is a common problem occurring in many medical problems. The frequency/prevalence is variable, with some progressive neurological problems having a prevalence up to 100% as the disease progression occurs. The prevalence will be higher in different settings, with care homes including the most vulnerable in society and having a larger number of people with dysphagia with the least experienced staff. The management and rehabilitation of dysphagia is unclear, with little evidence available outside of stroke, and any studies are small and frequently conducted in people who are either young or do not have clinical dysphagia. This Special Edition will focus on the management of dysphagia across the medical spectrum. Topics could include new research or reviews and cover the full spectrum of medical conditions from frailty, learning disorders to end of life. **Keywords**

- Dysphagia
- Rehabilitation
- Neurology
- Learning disability
- Frailty

About the Journal

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Editor-in-Chief
