Geriatric Assessment: Multidimensional, Multidisciplinary and Comprehensive

Message from the Guest Editor

Geriatric assessment—broadly defined—is the foundation of care for frail elderly people at risk for functional decline, death, and long-term institutionalization. Its key feature is ascertainment of multiple dimensions of health and health risks—not only medical, but functional, cognitive, psychological, and socioeconomic status. This multidimensionality is key to systematic screening and targeting to uncover frail, at-risk elderly people in their neighborhoods, homes, and at various other service contact points, for more intensive evaluation, i.e., “comprehensive geriatric assessment” (CGA)—a multidisciplinary diagnostic and treatment process that identifies medical, psychosocial, and functional limitations of a frail older person to develop a coordinated plan to maximize overall health with aging. We invite international submissions describing new or established CGA-oriented or based processes, technologies and models of care, particularly welcoming evaluations, quasi-experiments, and randomized trials aimed at establishing their outcomes, costs, and value.

About the Journal

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Editor-in-Chief

Prof. Dr. Ralf Lobmann

Department of Endocrinology, Diabetology and Geriatrics, Clinical Centre Stuttgart–Katharinenhospital, Kriegsbergstrasse 60, D70174 Stuttgart, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

CiteScore - Q2 (Health (Social Science))
