

Special Issue

Stroke in the Elderly

Message from the Guest Editor

We are delighted to announce the launch of the Special Issue of "Stroke in the Elderly". As the population ages and advances continue that see improvement in stroke for people of older age, it is becoming increasingly important to properly evidence this area. We are looking forward to a range of articles covering all aspects of this exciting area. They may explore the differences in outcomes between older and younger stroke populations or reflect new data purely studying older people suffering stroke. There is also considerable scope for studying stroke in the oldest old. We would be particularly keen to see how common concepts in Geriatric medicine, such as frailty, sarcopenia, falls or polypharmacy (to name but a few) play a role in this population. We look forwards to receiving your work.

Keywords

- stroke
- elderly
- older person
- oldest old

About the Journal

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Editor-in-Chief

Prof. Dr. Ralf Lobmann
