

Special Issue

Health Care and Successful Aging

Message from the Guest Editor

As the world population ages, there is increasing interest on the biological and social determinants of successful aging through the lenses of cognitive function, physical function, and psychosocial function. Health care and successful aging presents huge opportunities for quality improvement of seniors care around the world.

This Special Issue on Geriatrics will focus on the determinants of successful aging in older people, knowledge translation of these determinants and their impact on health care, the contributions of emerging technologies and innovations to successful aging, and the resultant quality improvement opportunities for seniors care. The Special Issue provides an open access opportunity to publish quality manuscripts on this important and rapidly evolving field of aging-related research. Keywords

- Successful aging
- Cognitive function
- Physical function
- Psychosocial function
- Health care
- Quality improvement

About the Journal

Message from the Editor-in-Chief

Our new journal is launched to serve geriatrics specialists and colleagues from other disciplines as an interface between theory and clinical practice. Pushing the boundaries of the discipline, I kindly invite you to consider publishing your current work in *Geriatrics*. We have chosen the format of an open access journal to provide all interested parties with a platform for their basic research and health care studies as well. For details on the submission process or any other matter, please visit the journal website. I hope to handle your contribution to *Geriatrics* soon to publish innovative, relevant, thought provoking ideas.

Editor-in-Chief
