Deadline for manuscript submissions:
31 May 2024

Message from the Guest Editor

Dear Colleagues,

In recent years, there has been a significant upward trend in global interest from the health sciences in the notion of compassion, and a global approach has been attempted from a variety of perspectives. The scope of this Special Issue is to determine the relation of compassionate care to the following:

1. The quality of care and patient safety;
2. Well-being, resilient nurses, and the cultivation of self-compassion;
3. Ways of combating compassion fatigue;
4. This Special Issue aims to bring together new research in the field, uniting scientists and clinical carers in order to present things nurses need to know in order to cultivate their self-compassion and ways to combat compassion fatigue, especially in the meta-COVID era.

We welcome contributions in the form of original research articles, reviews, mini-reviews, brief research reports, and commentaries.

- compassionate care
- quality care
- patient safety
- resilience
- self-compassion
- compassion fatigue
