### Message from the Guest Editors

Dear Colleagues,

The Special Issue will focus on the impact of alcohol use and hangover on physical and mental health. Alcohol is the most widely used psychoactive substance globally. Heavy and harmful use of alcohol represents a high burden of diseases with significant social and economic consequences. Alcohol hangover also has the potential to impact physiological and psychological mechanisms underlying everyday behaviours including driving, workplace absenteeism and productivity, and interpersonal relationships.

This Special Issue aims to bring together research across fields including psychology, public health, and pharmacology. We look forward to receiving your contributions to this Special Issue addressing the impact of alcohol use and hangover.
