Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editors

According to the WHO, “sexual health is a state of physical, emotional, mental and social well-being in relation to sexuality, and it is fundamental to the overall health and well-being of individuals, couples, and families”. The interaction between mental health and sexual health should be deeply investigated to provide evidence that improves the quality of life of people. It is known that psychological difficulties affect sexual functioning and, therefore, general sexual health. For this Special Issue, we encourage researchers to submit manuscripts focused on sexual-health-related issues, sexual functioning, and psychological variables. Studies on sexuality and its relationship with psychological well-being, as well as those concerning the role that mental health plays in sexual functioning, are of interest. Additionally, to evaluate and intervene in sexual health, studies on the adaptation and/or validation of instruments for assessing psychosexual variables are welcomed. Those studies that encompass gender identities, sex, sexual orientations, and different sexual contexts related to public health will be considered.

an Open Access Journal by MDPI
