### **Message from the Guest Editor**

Allergy and immunology are disciplines which are strongly related. Allergy diseases have immunology fundamentals in their pathogenesis, classification, diagnosis, and treatment. Therefore, it is of great interest to know more about allergy diseases, their immunological background, coexistent pathologies, and strategies for diagnosis and treatment.

In this Special Issue, we invite manuscripts that consider topics related to allergies and hypersensitivity diseases in medical care. Original research and review articles are welcome which evaluate immunology disorders or hypersensitivity conditions. Work including treatment methods is also welcome.

- allergy
- hypersensitivity
- immunology disorders
- autoimmune diseases
- healthcare
- prevention
