2. Department of Nursing, School of Health Sciences, Hellenic Mediterranean University, 71410 Heraklion, Greece

Deadline for manuscript submissions:
31 March 2025

Message from the Guest Editors

Healthcare education plays a crucial role in promoting high-quality and evidence-based clinical practice at all levels of care. It enables healthcare professionals to enhance their knowledge and skills, starting from university and continuing throughout their careers, to provide the best possible care for their patients. Importantly, primary care plays a pivotal role in diagnosing, managing, caring for, and educating patients and their caregivers, serving as their primary point of contact in the healthcare system. This highlights the importance of healthcare professionals in primary care settings having received adequate education and continuing to pursue further learning opportunities. <false,>We are pleased to invite you to contribute to this Special Issue, which aims to highlight areas and/or methods that could enhance primary care by improving healthcare education.
