Message from the Guest Editors

The patient-centered model of care aims to overcome the boundaries between medicine and psychology in clinical settings, focusing on the importance of taking into account not only the disease but also the patients' characteristics (in terms of needs, preferences, values, personalities, psychopathologies, and so on). In this framework, personalised medicine addresses the urgent need to tailor medical treatments to the patients' psychological features. It is interesting to think that psychological factors will be progressively recognised as part of the clinical and diagnostic decision process.

Starting from these premises, we call for papers addressing the role of the patients' psychological and psychodynamic factors in influencing the onset, adjustment, and clinical response to their treatments, with particular attention on the doctor–patient relationship and therapy adherence. Papers on the efficacy/effectiveness of psychotherapy in medical settings are welcomed as well.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
