Deadline for manuscript submissions:

**closed (31 March 2023)**

### Message from the Guest Editor

Decision-making medical systems (DMSs) refer to decision strategies or methods in healthcare. They are a process involving ideas and decisions about certain events, and they are a complex process in terms of operations. They include information collection, processing, judgments, and conclusions. DMSs are a subject that looks into computer simulations and assesses certain thinking processes and intelligent behaviors of humans. DMSs can help us to make the best choices. The most commonly used artificial intelligence and learning machine tools for decision making are genetic algorithms, cellular automata, and agent-based models. The aim of this Special Issue is to bring together original research and review articles discussing how artificial intelligence and learning machines in decision making help to conduct further research in computer science, engineering, physics, mathematics, and medicine public policy. This Special Issue aims to provide a platform for researchers to discuss their new findings in understanding how artificial intelligence can solve issues related to decision-making medical systems.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
