**closed (31 October 2023)**

### Message from the Guest Editors

Dear Colleagues,

Over the last few years, the breathtaking pace of advances in translational medical knowledge has been generating vast quantities of digitized biomedical and health care data that more than match the quintessential five Vs of Big Data—Volume, Velocity, Variety, Variability, and Veracity.

As the fusion of biomedical research with Big Data continues to break new grounds, a fresh examination of the adequacy of existing health and medical policies is warranted.

To that end, this Special Issue on “Health and Medical Policy in the Era of Big Data Analytics” seeks original research, reports, and reviews that highlight challenges posed in developing actionable policies with Big Data analytics to provide state-of-the-art, affordable, and equitable biomedical health care to all. Research contributions showing how augmenting AI/machine learning techniques with Big Data analytics could help mitigate health care disparity are also welcome.

- artificial intelligence/machine learning
- medical and health care policy
- fairness and disparity in the health care system

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Healthcare* is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

*Healthcare* hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)
