Message from the Guest Editors

Dear Colleagues,

Significant improvement in healthcare delivery has brought about increased life expectancy, equating to a larger percentage of older adults with multiple chronic disease conditions and functional impairments.

With the aim of advancing research, scholarship, caring science, and academic discourse in the field, this Special Issue of *Healthcare* seeks original commentaries, research, short reports, and literature reviews related to trends, issues, and challenges in long-term care for older adults, focusing on healthcare innovations and technologies catered to helping this population. Your submission may include topics related to one or more of the following keywords: Long-term care; Older adults; Quality of life; Evidence-based nursing care; Caring; Rehabilitation; Advanced technologies; Community nursing; Quality of life; Public health.

Your scholarly contribution will help further evidence-based practice, foster a culture and system of quality care, and produce data-informed policies concerning gerotechnology.

We invite you to take part in this noble endeavor.
