Message from the Guest Editor

Dear Colleagues,

This special issue of *Healthcare*, entitled *Mental and Physical Health Related to Traumatic and Adverse Experiences*, has the ambitious goal of garnering research and review papers from scholars across medical and academic disciplines with the hopes of identifying work that will contribute to the recognition and recovery of people experiencing traumatic and adverse experiences. Multidisciplinary research projects are especially encouraged. Papers focusing on both Criterion A traumatic events, using traditional diagnostic nomenclature (i.e. PTSD), and those focusing on adverse events, which are typically not considered as Criterion A, but nonetheless, lead to similar stress related outcomes are welcomed. In addition, papers focusing on recovery, including identification of mental, physical, and alternative health interventions for such traumatic and adverse events will be considered.
