New Advances in Digital Health Interventions

Guest Editors:

Prof. Dr. Luís Velez Lapão

Dr. Marilia Silva Paulo

Dr. João Pedro Gregório

Deadline for manuscript submissions:
31 December 2024

Message from the Guest Editors

PHC digitalization opens a possibility for the collection of structured data to enable tailored care, providing innovative, efficient, and affordable solutions to patients at any time, from anywhere and in a friendly manner. The development of analytical tools supported by HIS that push the management of health conditions to the community may enable policy makers to better realize the value of PHC services. Giving a greater emphasis to PHC supported by information technologies has the potential to contribute to the sustainability of future health systems and allow the continuous fostering of innovation to the healthcare sector, contributing to its resilience and sustainability.

This Special Issue aims to present the latest developments of digitalization in primary health care. Researchers are invited to submit original research articles, , using any study design, including case studies, implementation/interventional studies, cohort studies, cross-sectional studies, clinical trials and meta-analyses.
