24 May 2024

Message from the Guest Editors

Dear Colleagues,

Sexual and reproductive health is the foundation of general health; this is the determinant and indicator of social development. Sexual and reproductive health is crucial to a person's general health and wellbeing, and it reflects the state of health in childhood and adolescence and guides the development of health and life expectancy after the reproductive period.

This Special Issue seeks empirical and practical studies, considering reproductive and sexual health on topics including but not limited to:

Adolescent sexual and reproductive health and rights; Sexual health education; Family planning and contraception; Fertility care; Human rights, gender equality, and social determinants; Maternal and perinatal health; Sexual and reproductive health; Sexual rights and HIV; Self-care interventions; Sexual and reproductive health and rights in health emergencies; Sexual dysfunctions in women and men; Sexually transmitted infections; Female genital mutilation; Violence against women and girls; Digital innovations; Other.
