Dr. Maria Cristina Monti
Department of Public Health, Experimental and Forensic Medicine, Unit of Biostatistics and Clinical Epidemiology, University of Pavia, 27100 Pavia (PV), Italy

Deadline for manuscript submissions:
closed (30 June 2023)

Message from the Guest Editors

Biostatistics and clinical epidemiology are playing a key role in the context of public health and health research, starting with the choice of the right study design and concluding with an efficient communication of the results. The way to generate information in the context of public health could be improved using different types of statistical models and study designs, helping different healthcare figures to describe new evidence in different health scenarios.

Original articles on the multidisciplinary context of healthcare or interesting methodologies on clinical data will be considered.

The aim of the Special Issue is to provide new evidence and results, methodologies, and statistical models to enrich public health.
