Message from the Collection Editors

- Preventive strategies associated with COVID-19 to promote health behaviours, for instance, handwashing, mask-wearing behaviour, social distancing, and vaccine acceptability, screening, testing, and tracing. Theory-based health behaviour intervention studies are highly encouraged.

- Effect of COVID-19 on job sectors, for example, changes in employment and labour force participation.

- Effect on psychosocial health across different population groups, including general, healthcare workers, geriatric, young adults, etc.
