closed (1 December 2021)

Message from the Guest Editors

Dear Colleagues,

Research in medicine is fundamental and this Special Issue is dedicated to all advances and innovations in otorhinolaryngology. New methods of diagnosis and innovation in treatment are fundamental steps to improve the quality of cure and the quality of life for patients affected by otolaryngologic disorders. This Special Issue aims to stimulate discussions among clinicians and researchers about innovative treatments. Clinical and basic research papers are both accepted.

We are interested in medical hypotheses, innovative case reports, case–control studies and clinical trials. Reviews and meta-analyses should be focused on specific aspects and bring innovation.

Best Regards
Prof. Dr. Arianna Di Stadio
