## Prevention and Clinical Treatment of Alzheimer's Disease

Guest Editor:

### **Dr. Syed Haris Omar**

Rural Clinical School, Faculty of  
Medicine, University of New  
South Wales, Wagga Wagga, NSW  
2650, Australia

Deadline for manuscript  
submissions:

**closed (31 July 2022)**

### **Message from the Guest Editor**

Alzheimer's disease (AD) is a multifactorial disease in the elderly population, spreading at the global level. As of now, there are no specific treatment and cure for AD. The search for molecules with less adverse effects than the available drugs has led researchers to investigate novel low-molecular-weight hybrid compounds of either synthetic or natural origin. Extensive research has been focused on natural products. In particular, biophenols have shown promising properties, being able to reduce AD pathogenesis in both in vitro and in vivo models.

This Special Issue, invites manuscripts (research, review, opinion and case studies) improving the current understanding, clinical prevention and treatment perspective of AD through the investigation of new biomarkers, the properties of A $\beta$  and tau peptides, the role of enzymes and genetic mutations.

## Editor-in-Chief

## Message from the Editor-in-Chief

*Healthcare* is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

**Journal Rank:** JCR - Q2 (*Health Care Sciences and Services*) / CiteScore - Q2 (*Leadership and Management*)
