Deadline for manuscript
submissions:
closed (30 September 2019)

Message from the Guest Editor

Dear Colleagues,

Lyme disease and associated tickborne infections constitute the fastest-growing epidemic in the world today. Furthermore, the discovery of new species of *Borrelia* has complicated the clinical picture of these diseases. The Special Issue will focus on epidemiologic, diagnostic and therapeutic aspects of tickborne diseases, including Lyme disease, Relapsing Fever *Borrelia*, and various tickborne coinfections including *Babesia*, *Anaplasma*, *Ehrlichia*, *Bartonella*, *Rickettsia* and tickborne viruses. New approaches for vaccines against tickborne diseases are also open for discussion.

Dr. Raphael B. Stricker
