Special Issue

Prevention and Control of Healthcare-Associated Infections: Current Strategies and Future Perspectives

Message from the Guest Editor

Healthcare-associated infections (HAIs) are currently one of the most important Public Health challenges worldwide. Moreover, there is a growing concern in the scientific community regarding the increasingly widespread and consistent phenomenon of antibiotic resistance. These pathogens are widespread in hospital environments and surfaces on which they can survive for a long period of time and, therefore, crosscontaminate medical devices with a high risk of being passed to patients. During this cross-contamination, a leading role is undoubtedly played by healthcare workers (HCWs) and their behaviour.

To fight this crucial public health issue, there are strategies including active surveillance, good practises in healthcare and antimicrobial stewardship, and novel strategies, such as the study of new materials with intrinsic antimicrobial properties for potential use in the manufacture of medical devices and hospital surfaces.

Accordingly, the present Special Issue aims to collect valid and rigorous scientific papers to summarize the current knowledge about this large, difficult public health challenge.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

issues.

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX 75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1 (Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
