Global Perspectives on Patient Safety: The Pivotal Role of Nursing Management

Message from the Guest Editors

Patient safety is crucial for global healthcare services, as a significant number of patients experience adverse events due to errors in their care. Nurses, as frontline healthcare providers, deliver the majority of patient care during hospitalizations, therefore significantly influencing the safety of the care administered. Nursing leaders can undertake interventions such as ensuring sufficient resources, developing protocols, offering support during care despite errors, supporting workplace well-being, and fostering a culture of safety to mitigate errors and enhance patient safety. This Special Issue aims to emphasize nursing management factors that enhance care safety, including error reduction, adverse event mitigation, quality assessment, and the establishment of a safety culture.

Nursing management strategies pertinent to this topic may encompass the application of leadership styles, the work environment, nurse well-being, social support for nurses, and the advancement of innovation. Original research articles, systematic reviews, and meta-analyses are welcome. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Healthcare is an international, peerreviewed, open access, multidisciplinary journal. Original research articles, short communications, review articles, and symposium highlights are welcomed.

Healthcare hopes to influence global health and disease aspects, and hopes to gain high visibility and acceptance by the scientific and healthcare community and will dedicate itself to covering special and specific topics in special issues.

We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Lorraine S. Evangelista

Louise Herrington School of Nursing, Baylor University, Dallas, TX
75246-1754, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank:

JCR - Q2 (Health Policy and Services) / CiteScore - Q1
(Leadership and Management)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the first half of 2025).
