

Special Issue

Gynecological and Obstetric Health Complications Related to Emotional Stress

Message from the Guest Editors

The scope of this Special Issue is to highlight present and future challenges in field of gynecological and obstetrics health complications related to emotional stress. Experience to emotional stress caused by personal relationship disturbances; physical , mental, substance abuse; armed or no armed conflict interactions ; natural disasters; terror; adverse environmental factors; insufficient health education and poor access to health services ; lack of emotional and economic support , all of them, may lead to psychiatric disorders, and often coexists with gynecological and obstetrics health complications , including but not limited to both psychiatric and other somatic comorbidities. It is important to explore the common bio-psycho-social pathomechanisms, to develop guidelines to identify harmful factors on daily basis , in some of causes related to genetic backgrounds, and in turn to develop implications for clinical practice to protect pregnant woman-fetus-child system against risk factors linked to emotional stress and to provide an innovative & effective diagnostic method & treatment.
